

HO LONG NGUYET THUY

Date of birth: 04.07.2000

Email: biohlnthuy@gmail.com

Phone: 0376276417

EDUCATION

2020 - now:

Lab. of Molecular Biology (*beginning 05/2023*)

Department of Genetics

Faculty of Biology & Biotechnology

Vietnam National University - University of Science

Bachelor of Science (*studying*)

2018-2020:

Bachelor of Journalism, VOV College

LAB TECHNIQUES

Extract DNA, RNA

PCR

Gel Electrophoresis

RT-qPCR

Biostatistics (T-test, Chi-square test, ANOVA)

Sterilize Tomato's seeds

Molecular cloning

Protein expression

LANGUAGE

English: Intermediate

Mandarin: HSK4 (273/300)

Vietnamese - Mother tongue

RESEARCH TOPIC

Initial investigation of Adenosine triphosphate (ATP) perception in tomato *Solanum lycopersicum* L.

Adenosine triphosphate (ATP) is commonly known as the energy molecule inside the cells of most living organisms on Earth. When released outside the cell at high concentrations, extracellular ATP (eATP) plays a role as a danger signaling molecule. The role of eATP has been demonstrated to be associated with various processes in the growth, development, and defense of animals. Nevertheless, understanding of eATP in plants is still limited. We aim to: 1) Apply molecular biology techniques to investigate the relationship between eATP and responses to wounding in plants; 2) Apply computer structural modeling to investigate the binding ability of eATP on potential receptors in plants.

ACHIEVEMENT

Encouraging Study Scholarship: Semester 2, Semester 3

AIM

Graduate with distinction (GPA 3.2)

Get full scholarship for Master's program in Biostatistics

Work and Research in Molecular Biology, Biological Data Analysis fields

REFERENCE

Ph.D An Quoc Pham - Bachelor of Sciences, University of Sciences, HCMUS-VNU HCM, major: Biotechnology Ph.D, University of Missouri-Columbia (MU), major: Plant sciences

Email: pqan@hcmus.edu.vn

Phone: 0936023544

EXPERIENCE

2024:

I got the "Vietnam International Conference 2024: Advances in Plant Biology" Student Award. The conference organized at the International Centre for Interdisciplinary Science and Education (ICISE).

2023:

Join the "Hội thi Vườn ươm Mendel" organized by the Faculty of Biology & Biotechnology, Vietnam National University - University of Science.

2022:

Join the "Stem cell Innovation" organized by the Stem Cell Institute, Vietnam National University - University of Science.

2020:

Join the course "Communication skills in the field of Biodiversity conservation" - Mzung Nguyễn, Independent Filmmaker and Environmental Journalist

2019 - 2020:

Collaborator of Mực Tím Online

WORKING ABILITIES

Hard-working, Responsible, Honest, Withstand pressure

Team work, Individual work

Presentation skill, Excel, Powerpoint, Word, Graphpad prism

Read scientific papers

Synthesize & Analyze information
