Career goals

-Work in a dynamic and comfortable creative environment.

- Learn and accumulate experience from colleagues in the company

Summarize yourself

-A person who knows how to listen, learn and withstand work pressure

-Ready to work with the group

- Know how to quickly respond to the working environment

- Creativity at work

SKILL

Basic grasp of C/C++ language.

- Grasp the basic knowledge of C/C++
- Grasp the actual working process in the project

Use specialized software such as Proteus, Arduino IDE...

- Can design electrical circuits, circuit operating principles on Proteus.
- Can program microcontrollers such as: arduino uno, STM 32 , ESP8266, ESP32...

STUDY

COLLEGE OF TECHNOLOGY - UD

08/2014 - 07/2017

Major: Information Technology

GPA: 2.93/4

UNIVERSITY OF TECHNOLOGY AND EDUCATION - UD

08/2018 - 07/2022

Major: Electronics and Telecommunications

GPA: 3.25/4

EXPERIENCE

FPT SOFTWARE ĐÀ NẴNG

05/2022 - 06/2023

Programming staff

- Designing an HMI system for Suzuki: Using QML in QT5 to build a desktop app interface on a car, create an API in C++ language, and implement communication between the interface and the API.

- Perform Unit Testing for Astemo: Write Testcases for customer functions.

- Participate in the union work team: Develop activity programs for all employees of the unit, programs to welcome New Members, monthly birthdays...

RTC WEB APPLICATION TO CONTROL ROBOT THROUGH A BROWSER

08/2021 - 12/2021

Content: RTC web protocols, Web Socket, Raspbery Pi Calculator.

Result: Transmits and receives data through Web socket

RESEARCH AND DESIGN OF SMARTCAMBUS MODEL

01/2020 - 06/2020

Accessible software: Arduino IDE, Proteus, Altium.

Microcontroller: ESP32

Result: Completed SmartCambus model with functions such as: fire alarm, control of electrical equipment, attendance via RFID card, display of temperature and humidity on the screen, timer to turn on and off the device in room.

DESIGN A COUNTER USING INFRARED

10/2020 - 12/2020

- English communication**
- Can read and understand work-related documents
 - Basic communication in life

INTEREST

- Volleyball
- Play football
- Read a book

SENSORS

- Accessible software: Proteus, Altium
- Calculate and select components
- Result: Design a complete counter that operates accurately in practice
- .

HỢP TRÍ LỰC ELECTRONICS COMPANY 09/2021 - 12/2021

Intern

- Perform simple electronic circuit construction.
-

VIET NAM AB INBEV COMPANY 06/2019 - 08/2021
Business man

- Support creating content to promote products and implement business plans
- Introduce, advise customers, answer customer questions about products

SUN* COMPANY 07/2017 - 04/2018
Ruby on Rail Programming Intern

.

ACTIVITIES

VOLUNTEER 2015-2016-2018-2019 -

VOLUNTEER

- Participate in popularizing information technology knowledge for poor students in mountainous areas
-
-

PARTICIPATE IN SUPPORTING COVID -19 PREVENTION WORK 05/2021 - HIỆN T

VOLUNTEER

- Participate in the Covid-19 prevention and control work in Que Son, Quang Nam

ACHIEVEMENTS

- Won 3rd prize in the contest for excellent students in Programming 2016
- Title of 5 best student at school level 2021
- Title of 5-good student at the University of Danang level 2021
- Title of 5-good student at Da Nang City level 2021
- Encourage academic scholarship 2018-2019-2020-2021

Jesco Asia Scholarship

2020

2021

Certificate of merit from the president of the Da Nang City Student Association for outstanding achievements in study and union work (2018-2021).
